

Reading and/or Math Instructional Interventions

The Eugene 4j School District administers both reading and math assessments to each of our students three times a year ~ fall, winter, and spring. Students scoring below the 20th percentile may be recommended, by the building-level team, to receive instructional interventions in reading and/or math. Students receiving interventions will have their progress monitored during regular intervals. At our school, all students receive 90 minutes of reading instruction and 60 minutes of instruction in the area of mathematics, each day. Parents/guardians will be notified if their child is recommended to receive additional reading or math instruction.
